Inhalt

The seminar deals with the transition from education to the labour market. We will read and discuss the main theoretical approaches that connect education to labour market placement and outcomes. In addition, we will consider how country differences in the setup of educational systems and labour market structures influence the transition from school to work. The theoretical considerations will be complemented by a discussion of empirical studies.

Voraussetzungen / Organisatorisches

Each session is devoted to a core topic. As a basis for discussion, all participants have to read one or two central texts per week. In addition, each participant has to take over the chair of one session (this can be done in groups of two or three), which includes a short presentation based on additional literature. The job of the session chair is to structure the session by developing topic-related questions or theses and to moderate the discussion.

The exam will be an oral examination of 20 minutes.
